

DM300C™

Franking Machine

Sophisticated features in a compact package to maximise office productivity using the cutting edge technology of Intelliink™

The DM300C™ is the ideal franking machine for the efficient running of your business

Value for Money

With state of the art digital technology, high quality printing for clear, crisp impressions.

Remote Re-crediting

Telephone re-crediting 24/7 with a quick and easy system of top-ups via a simple phone call.

Cost Centre Accounting

Allocate and store postal usage within your company for up to 100 different cost centres, or different customers.

Weighing Scale

The system comes with a simple integrated 5kg scale that sets the franker to the correct postage. For more complex rates including "add on" values like overseas "International Signed For" (and others) we can interface a more complex scale (details available on our website) which can calculate these complex rates to set on the franker keyboard.

Differential Weighing

Stack many items on the scale to its maximum capacity, then by removing one item at a time the system sets the value of each item automatically – saving loads of time by simple handling. Optional 7, 12 or 35kg interfaced weighing platforms.

Label Dispenser

Automatic tape dispenser when selected for application to packets and parcels.

Incoming Mail Dating

Intelliink™ date and time stamping capability ensures incoming mail is handled efficiently by providing the option of recording when it arrives.

This flexible machine is ideal for businesses with varied letter and parcel post. With the DM300C™, you'll always have the postage you need.

SPECIFICATIONS

Model	DM300C™
Machine size	L370 x D435 x H315mm
Automatic tape dispenser	For parcels and oversize items
Weight	8.5kg
Maximum speed	65 letters/min

The Benefits of Franking

What are the benefits of Franking?

- Cost Saving – franked mail gives a discount over stamps of between 12% and 21% depending on weight.
- Time Saving – far quicker to frank than to maintain a stamp book and visit the Post Office to top it up.
- Image – a franked letter with your own return address and slogan gives a professional touch to your mail and enables the return of “gone aways” to keep your database up to date.
- Correct Value – by setting the correct value each time it avoids using incorrect stamp values if they are not easily available, so more cost savings.
- Credit Always Available – using the telephone re-credit system, when the franker runs out a telephone call at any time 24/7 “tops up” the credit value to let you carry on posting – no running out of stamps.
- “Pricing in Proportion” – all products are fully compatible with PIP services and rates.
- Printing Method – via compact replaceable ink cartridge.

Why purchase your franking machine from Totalpost?

We are one of the few independent Royal Mail approved suppliers and maintainers of franking machines to give full U.K. coverage (apart from some manufacturers). We can give excellent personal service at keen prices by supplying equipment from two of the largest manufacturers; but sold, serviced and “looked after” by our own proven team.

“Large enough to be national – small enough to care” is a maxim we believe in, so if you are a stamp user wanting equipment for the first time, or a multinational wanting to upgrade dozens of older models, we can help.
