

MSL 250

LOW VOLUME FRANKING MACHINE

Features

- **Value for Money.** With state of the art digital technology, high quality printing for clear, crisp impressions.
- **Remote Recrediting.** Telephone re-crediting from £10 to £500 on a 24/7 basis, with full statements of usage being provided (via manufacturer).
- **Easy to Use.** A simple feed mechanism allows easy printing onto envelopes, or labels for larger packages or parcels.
- **Weighing Scale.** The system comes with a simple 2kg scale that sets the franker to the correct postage. For more complex rates including "add on" values like overseas "International Signed For" (and others) we can interface a more complex scale (see our scales) which can calculate these complex rates to set on the franker keyboard.
- **Full Control and security.** The MSL 250 is lockable and PIN protected so only approved users can access it. A printed usage report can be printed.

Specifications

Franker Size	300x190x210mm
Scale Size	135x30x165mm
Weight	2.8kg
Max Speed	20 letters / minute

Why purchase your franking machine from Total Postweigh?

We are one of the few independent Royal Mail approved suppliers and maintainers of franking machines to give full U.K. coverage (apart from the 4 manufacturers). We can give excellent personal service at keen prices by supplying equipment from two of the largest manufacturers; but sold, serviced and "looked after" by our own proven team.

"Large enough to be national - small enough to care" is a maxim we believe in, so if you are a stamp user wanting equipment for the first time, or a multinational wanting to upgrade dozens of older models, we can help.

What are the benefits of Franking?

- Cost Saving - franked mail gives a discount over stamps of between 6% and 7% depending on weight.
- Time Savings - far quicker to frank than to maintain a stamp book and visit the Post Office to top it up.
- Image - a franked letter with your own return address and slogan gives a professional touch to your mail and enables the return of "gone aways" to keep your database up to date.
- Correct Value - by setting the correct value each time it avoids using incorrect stamp values if they are not easily available, so more cost savings.
- Credit Always Available - using the telephone re-credit system, when the franker runs out a telephone call at any time 24/7 "tops up" the credit value to let you carry on posting - no running out of stamps.
- "Pricing in Proportion" - all products are fully compatible with PIP services and rates.
- Printing Method - via compact replaceable ink cartridge.
