

## PersonalPost™ Plus Mailing System

### How will your business benefit

- **Never Run Out of Stamps** - Postage can be purchased over the phone and loaded directly into PersonalPost™, using its internal modem. This is called Postage by Phone™ and the process only takes 30 seconds. The days of queuing for and running out of stamps are gone, saving you more time.
- **Advertise on Your Mail** - PersonalPost™ can attract attention to your company by digitally printing advertising messages along with the postage. There are 7 pre-loaded messages FREE and, for a minimal charge, you can design your own. Instantly, your company will look bigger, better and most importantly, more professional.
- **Exact Postage Only With 2kg Interfaced Electronic Scale** - PersonalPost™ can handle thicker envelopes, packets and parcels. The electronic scale tells you the exact weight and then works out the correct postage. Attaching extra stamps to "make certain it gets there" is a thing of the past, saving you more money.
- **Specifically for Smaller Offices** - Stylish and compact, it is designed with the smaller office in mind.
- **Easy to Use and Install** - Using the "Quick Install" directions, there is no need for an engineer, you can set it up yourself. PersonalPost™ is also extremely simple to use.
- **Inbuilt Security** - Your unique PIN means only the post you want sent, gets sent.
- **Increased Convenience** - The whole concept of PersonalPost™ is designed to make office admin more convenient, enabling you to concentrate on more important business issues.

# PersonalPost™

Printing advertising messages on your envelope

One push gets you postage in about a minute

Get the exact weight and then the exact postage

Meter any type of mail - letters, packages, even Priority Mail.
